Corona Virus Covid-19 Update

OPEN FOR BUSINESS

With the government announcing a second lockdown starting 5th November until 2nd December 2020, we wanted to ensure our customers that we will remain open for business as normal, as we did during the first lockdown.

We also would like to detail the current actions Survival-32 are undertaking to minimise the risk to the disruption of supplies to our customers. Some of the steps we have initiated are:

- Enabled immediate remote working of some office staff to reduce contact between employees, with the ability to enable all office staff to work remotely so we can continue to process orders and work as normal.
- Ensured operational employees have cover in case of staff shortages.
- Increased preventative measures covering cleaning regimes, hygiene practices and reduced physical contact with persons not employed by Survival-32.

We are currently seeing high level of demand for cleaning products, medicines and mouthwashes but at present we not experiencing any exceptional stock shortages. Stock availability can be viewed on our website or please contact us.

We are keeping up to date with government and public health advice as it develops and will keep you informed of any updates to our situation.

(3rd November 2020)
